

# Inflow and Infiltration Sanitary Sewer Ordinance

## ORDINANCE NO. 01212020

### AN ORDINANCE FOR THE REDUCTION OF CLEAR WATER IN THE SANITARY SEWER SYSTEM

The City Council finds that the discharge of water from roof, surface, groundwater, sump pump, footing tile or swimming pool, or other natural precipitation into the municipal sanitary sewer system has the potential to cause property damage and overload the municipal and regional sanitary sewer systems. The City Council therefore finds it essential for the maintenance of health, minimization of property damage, and to maintain the life and capacity of the wastewater treatment system that the provisions of this ordinance be strictly enforced.

**The City Council of Newfolden, Minnesota ordains:**

#### **Section 1: Applicability**

This ordinance shall apply to all water entering the sanitary sewer system unless explicitly exempted by the City. The City and its representatives are authorized to administer, implement, and enforce the provisions of this ordinance.

#### **Section 2: Definitions**

For the purpose of this Ordinance, the following terms are defined:

*Clear water* means storm water, natural precipitation, melting snow, ground water, roof drainage, ground surface and subsurface drainage, down spout, yard drain, sump pump, foundation drain, yard fountain, pond, swimming pool, cistern overflow, or any other water that is not required to be treated by state or federal law. Swimming pool water that is required to be treated in accordance with city, county or state regulations shall not be considered clear water.

*Sewer service lateral* means all sewer service pipes that extend from the municipal sewer main to the structure that it serves.

#### **Section 3: Compatibility with Other Regulations**

**This ordinance is intended to modify or repeal the Newfolden Sanitary Sewer Ordinance.** The requirements of this ordinance are in addition to the requirements of any other ordinance, rule, regulation, or other provision of law, and where any provision of this ordinance imposes restrictions different from those imposed by any other ordinance, rule, regulation or other provision of law, whichever provision is more restrictive or imposes higher protective standards for human health or the environment shall apply.

#### **Section 4: Prohibition Against Discharge into the Sanitary Sewer System**

No person shall discharge or cause to be discharged into the municipal sanitary sewer collection system, or infiltrate into the sanitary sewer system any clear water because of a sump pump, defective plumbing, a defective sewer service lateral or by any other means.

- A. No person shall discharge or cause to be discharged any polluted water into **storm sewers** or other surface drainage systems. Polluted water is defined for purposes of this ordinance as water containing

foreign materials including, but not limited to, human or animal waste, household or agricultural chemicals, petroleum products, other non-biodegradable substances which could be harmful to the environment when accumulated.

### **Section 5: Sump Pump Regulation**

Any dwelling, structure or building that has a sump pump discharge system to remove groundwater from its foundation drain must have a permanently installed discharge line.

A “permanently installed discharge line” shall be one which provides for year-around discharge capability to either the outside of the dwelling, building or structure, or is connected to the City storm sewer. It shall consist of a rigid discharge line, without valving or quick connections for altering the path of discharge and, if connected to the City storm sewer line, include a check valve. It shall not be capable of connection or reconnection to the municipal sanitary sewer system.

### **Section 6: Inspection**

Every person owning improved real estate, or contractors and builders who are building a structure connected to the City’s sanitary sewer system, shall permit an inspection of each building located on such property by an inspector designated by the City. The purpose of this city inspection shall be to confirm that there is no prohibited discharge into the municipal sanitary sewer system.

Inspections may be done at regular intervals and may include, but not be limited to, manual inspection of the sump pump discharge system, visualization of lateral service lines via camera systems, and/or smoke testing.

This inspection requirement may also be met by having the property owner contract with a licensed plumber to perform the inspection. The plumber must inspect the property’s sump pump, sewer service lateral, and groundwater drainage system, and upon completion, return an inspection form documenting the results of the inspection. All costs associated with an inspection by a privately retained plumber shall be the responsibility of the property owner.

### **Section 7: Corrections**

Upon notice that the discharge of clear water on a property is not in compliance with this ordinance, the owner or occupant of the property shall cease from discharging clear water in violation of this ordinance and shall make the necessary repairs and corrections to discharge the clear water in accordance with this ordinance. Discharge of clear water in compliance with this ordinance shall be completed within **60** days of the date of notice of noncompliance, or as determined by the **public works director**. A second inspection of the property will be completed after **60** days following the notice of noncompliance.

### **Section 8: Violations**

A monthly surcharge in an amount duly adopted by the City Council and set forth in the City’s fee schedule shall be assessed against any property on which clear water is discharged in violation of this ordinance. The monthly surcharge will be charged on the property’s municipal utility billing statement if one or more of the following conditions apply: (1) an inspection as required herein has not been allowed by the property owner or occupant to verify compliance; (2) the property owner or occupant fails to make the sewer line cleanout readily available for the inspection; (3) the necessary corrections have not been made within the time specified; and (4) the property owner or occupant reconnects a clear water discharge line to the municipal sanitary sewer system after it has been previously disconnected at the city’s or a court’s direction. A surcharge will be assessed for every month during which the property is not in compliance.

### **Section 9: Temporary Waivers**

The City may grant a temporary waiver from the provisions of this section where strict enforcement would cause a threat of damage or harm to other property, the environment, or public safety because of circumstances

unique to the individual property or due to weather conditions. A written request for a temporary waiver must be first submitted to the **City Administrator** specifying the reasons for the temporary waiver.

The City Council may set conditions to the temporary waiver. The **City Council** must give a five-day written notice of the termination to the property owner and occupant setting forth the reasons for the termination. After expiration or termination of a temporary waiver, the property owner shall comply with the provisions of this ordinance.

**Section 10: Appeals**

Applications for appeal of any administrative determination made pursuant to this Ordinance shall be addressed in writing to the **city administrator** within 30 days of the determination.

Applications shall at a minimum identify the property for the appeal is sought, the name of the property owner, and describe in detail the determination which is being appealed. Within 60 days of receipt of the application, the City Council shall make its decision on the matter and send a written copy of such decision to the property owner by mail.

**Section 11: Severability and Validity**

The provisions of this ordinance are hereby declared to be severable. If any provision, clause, sentence, or paragraph of this ordinance or the application thereof to any person, establishment, or circumstances be declared by a court of competent jurisdiction to be invalid, such invalidity shall not affect the validity of other provisions or application of this ordinance.

Passed by the City Council of Newfolden, Minnesota this \_\_\_\_ day of \_\_\_\_\_, 2020.

SUMMARY OF CITY OF NEWFOLDEN, MINNESOTA  
INFLOW AND INFILTRATION SANITARY SEWER ORDINANCE NO. 01212020

AN ORDINANCE FOR THE REDUCTION OF CLEAN WATER IN THE SANITARY SEWE SYSTEM  
WITHIN THE CITY OF NEWFOLDEN, MINNESOTA

The following is the official summary of Ordinance No. 01212020, Third Series, approved by the City Council of the City of Newfolden on the 18<sup>TH</sup> day of February, 2020. This ordinance repeals the Newfolden Sanitary Sewer Ordinance.

This ordinance applies to the discharge of water from roof, surface, groundwater, sump pumps, footing tiles, swimming pools and other natural precipitation into the municipal sanitary sewer system. No person shall discharge any clear water into the sanitary sewer system, by any means, intentional or unintentional.

All dwellings with a sump pump are required to have a permanently installed discharge line to either the outside of the structure or connected to the City storm-sewer system

Inspections for compliance will be conducted at regular intervals and may include, but not be limited to manual inspection of sump-pump discharge system, visualization of lateral service lines via camera and/or smoke testing.

A monthly utility surcharge, determined annually, may be imposed if inspection is not allowed, if compliance cannot be verified, required corrections have not been made, and violations are determined.

A complete copy of this ordinance is available for inspection at the Newfolden City Office, 145 East First Street, Newfolden, MN 56738.
